

Silicon Valley Products
Disaster Recovery and Cloud Based
Solutions

Secure and Easily Access Your Data

Keeping a backup solution of important files and data is a necessity for your business.

Natural disasters can easily crash your system.

With a remote server or cloud based solution you no longer need to depend on traditional local networks and you will be up and running again in no time. We offer flexible solutions regardless of data size needed.

Benefits of our Disaster Recovery\Cloud Solutions include:

- Files are stored, made secure, and are available immediately
- Files can be accessed at multiple office locations
- Files can be accessed immediately on the internet
- Files can be accessed via mobile and tablet devices

Silicon Valley Products has a wide array of IT experience for multiple industries including insurance and financial services.
